Key Concepts	What is geography? <i>Locational and place knowledge.</i> <i>Geographical skills and fieldwork.</i>	United Kingdom <i>Locational and place knowledge.</i> <i>Physical geography.</i> <i>Human geography.</i>	Europe <i>Locational and place knowledge.</i> <i>Physical geography.</i> <i>Human geography.</i>	North America <i>Locational and place knowledge.</i> <i>Physical geography.</i> <i>Human geography.</i>	Settlement <i>Locational and place knowledge.</i> <i>Human geography.</i>	Geographical Enquiry <i>Geographical skills and fieldwork.</i>
Knowledge & Understanding <i>(National Curriculum)</i>	Build on their knowledge of globes, maps and atlases and apply and develop this knowledge routinely in the classroom. Interpret Ordnance Survey maps in the classroom and the field, including using grid references and scale, topographical and other thematic mapping, and aerial and satellite photographs.	Extend their locational knowledge of the United Kingdom with a focus on key physical and human characteristics and major cities. Physical geography relating to: weather and climate. Human geography relating to: population and urbanisation.	Extend their locational knowledge and deepen their spatial awareness of the world's countries using maps of the world. Develop their awareness and understanding of Europe. Focus on their environmental regions, key physical and human characteristics, countries and major cities.	Extend their locational knowledge and deepen their spatial awareness of the world's countries using maps of the world. Develop their awareness and understanding of North America. Focus on their environmental regions, key physical and human characteristics, countries and major cities.	Human geography relating to: population and urbanisation. Develop their understanding of settlement patterns and how this changes through time.	Use fieldwork in contrasting locations to collect, analyse and draw conclusions from geographical data, using multiple sources of increasingly complex information.
Assessment	End-of-unit summative assessment (teacher-assessed).	Y7 exam (cumulative, all taught key concepts assessed). Teacher-assessed.	End-of-unit summative assessment (teacher-assessed).	Group presentation (teacher-assessed).	Y7 exam (cumulative, all taught key concepts assessed). Teacher-assessed.	Enquiry workbook (teacher-assessed).
Why this? Why now?	This unit of work will discuss what the subject of Geography actually is and students will learn about the basic concepts of physical, human and environmental geography. They will discover the cross-curricular links geography has with other subjects and be introduced to the concept of fieldwork.	This topic leads on from learning about world locations to a national scale. Students learn the different countries within the UK and we discuss factors affecting their perception of their local place (at a range of scales). Students will learn key physical and human features in the UK,	By learning about a continent, students are able to make connections between different aspects of geography. We start locally then move to a larger scale. They can apply some of the knowledge and skills they have started to develop (migration, physical/human features and map skills). They can then start to assess the impact of	By learning about a continent, students are able to make connections between different aspects of geography. This is an increasingly large scale from the start of year 7, they should have some knowledge of North America (although this may be limited to the USA). They can apply some of the knowledge and skills they have	This topic provides the foundations for Geography skills and concepts, by looking at different regions we can apply a range of skills and introduce the concepts of case studies. Using place-based learning also makes the topic more relevant and interesting and makes the concepts and skills relatable to students' own lived experiences.	Geographical enquiry is a fundamental skill in geography required at all levels. In GCSE it is assessed in paper 3 making up half of the written examination. The unit is completed at the end of the year due to the weather being more favourable for fieldwork to collect primary data.

	<p>They will also develop their understanding of the location. Using OS maps, globes and GIS to identify key physical and human features around the world.</p> <p>This unit lays the foundation for the rest of Geography education at Southmoor and aims to fill in gaps in basic understanding of places.</p>	<p>allowing them to develop their knowledge of using an atlas and map skills from the previous unit.</p> <p>Students will explore issues of population, migration and industry in the UK. How these have changed and have shaped our country and how they may continue to change and the issues that may arise.</p> <p>This unit links to Urban Change in the UK and The Changing Economic World both of which are topics that are taught for the AQA GCSE paper 2.</p>	<p>them in Europe, alongside new knowledge of different countries. It also develops student's spatial awareness, which is a vital geographical skill each key stage.</p> <p>This particular unit links to the Living World (AQA GCSE paper 1) as it will help students to start to understand the world biomes. It also links to The Urban Change in the UK (AQA GCSE paper 2) as it begins to look at urban areas and population density.</p>	<p>started to develop (migration, physical /human features and map skills). They can then start to assess the impact of them in North America, alongside new knowledge of different countries, hazards and new environmental issues. It also develops student's spatial awareness, which is a vital geographical skill each key stage.</p> <p>This particular unit links to the Living World (AQA GCSE paper 1) as it will help students to start to understand the world biomes and environmental impacts. It also links to The Urban Change in the UK (AQA GCSE paper 2) as it begins to look at urban areas and population density.</p>	<p>Students can build on existing knowledge of places and apply theory of settlement patterns, growth and change.</p> <p>This particular unit links to the Urban World (AQA GCSE paper 2) and will help students to locate places and explain how cities have grown over time. It also links to The Changing Economic World (AQA GCSE paper 2) and will help students to understand that the role of trade in development. The physical geography links to the topic of Physical Landscapes (AQA GCSE paper 1) as although not UK landscapes as in the GCSE it will provide some understanding of landforms and processes as well as how people can affect the environment.</p>	
Skills & Characteristics	<p>This unit will develop a range of skills and characteristics including but not limited to;</p> <ul style="list-style-type: none"> Using and interpreting a range of maps OS map skills (including grid 	<p>This unit will develop a range of skills and characteristics including but not limited to;</p> <ul style="list-style-type: none"> Using and interpreting physical maps Interpreting and completing population pyramids 	<p>This unit will develop a range of skills and characteristics including but not limited to;</p> <ul style="list-style-type: none"> Using and interpreting human physical maps Interpreting and completing Climate 	<p>This unit will develop a range of skills and characteristics including but not limited to;</p> <ul style="list-style-type: none"> Using and interpreting human physical maps Analysing a range of sources to make an evaluation 	<p>This unit will develop a range of skills and characteristics including but not limited to;</p> <ul style="list-style-type: none"> Using and interpreting human physical maps Analysing a range of sources to make an evaluation 	<p>This unit will develop a range of skills and characteristics including but not limited to;</p> <ul style="list-style-type: none"> Describing locations Asking geographical questions Collecting primary data

Basic (Lower Ability End Points)	Clear (Middle Ability End Points)	Detailed (Higher Ability End Points)
<ul style="list-style-type: none"> • Pupils show knowledge and understanding of aspects of the geography of the UK and the wider world. They recognise and describe the physical and human features of places and begin to do this within a wider locational framework. • They recognise and describe simple geographical patterns. They understand that people can both improve and damage the environment. • They begin to develop geographical skills – mainly OS map skills. 	<ul style="list-style-type: none"> • Pupils develop their knowledge and understanding of geography of the UK and wider world. They describe how physical and human processes can change the features of places and how these changes affect the lives and activities of people living there. • They offer reasons for their own views about environmental change and recognise that other people may hold different views. • Drawing on their knowledge and understanding, they begin to suggest suitable geographical questions, and use a range of geographical skills to investigate places and environments. They use primary and secondary sources of evidence in their investigations and communicate their findings using appropriate vocabulary. 	<ul style="list-style-type: none"> • Pupils show increasing depth of knowledge and understanding of aspects of the geography of the UK and the wider world. They use this to describe physical and human characteristics of places within a wider locational and contextual framework. They describe how physical and human processes can lead to similarities and differences in the environments of different places and in the lives of people who live there. They describe and begin to explain geographical patterns. • They can use a wide range of geographical skills to investigate place and environments. They confidently use primary and secondary sources of evidence in their investigations and communicate their findings using appropriate vocabulary.
